

TRANSPLANT

MASK UP BEFORE ENTRY

IMMUNOSUPPRESSANT TROUGH PROTOCOL ACTIVE

By 07:30

Verify trough order is present. If not, contact provider.

08:30 – DRAW FIRST

Draw trough level before administering the morning dose.

Window: 08:15 – 08:45

By 09:00 – THEN DOSE

Administer the scheduled dose immediately after the draw.

Do NOT draw trough with routine overnight labs (01:00 – 06:00)

Do NOT hold the dose waiting for the lab result

Dose given BEFORE the draw = invalid trough. Contact transplant provider.

MAR Documentation

Every dose: record the actual administration clock time (not the scheduled time).

If a dose is given late (>30 min off schedule): document the reason in the MAR note — procedure, NPO, pre-procedural, pt refused, transfer, medication delay, etc.

Window missed, dose before draw, or timing unclear?

Contact transplant provider immediately
